PROFESSIONAL SUMMARY

Full-stack developer with a strong foundation in modern web technologies, having built and delivered multiple end-to-end applications using React.js, Spring Boot, and Django. Experienced in designing RESTful APIs, managing relational databases, and collaborating in Agile team environments through hands-on academic and personal projects. A fast learner who takes initiative and adapts quickly, eager to contribute and grow within a professional development team.

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+)

Backend: Python (Django), Java (Spring Boot)

Databases: MySQL, PostgreSQL (Supabase)

CMS & Security: WordPress (security auditing, plugin management, content editing)

Tools & Practices: Git, GitHub, RESTful APIs, Agile, documentation

Currently Learning: Docker, cloud deployment (AWS/GCP basics)

EXPERIENCE

Information Technology Intern (OJT) 2026

Knowles Training Institute — Singapore (Remote)

- Performed routine security audits on WordPress websites, identifying and resolving plugin vulnerabilities and screening for malware and external threats.
- Monitored and maintained uptime and performance across multiple web properties, proactively resolving issues before impacting end users.
- Redesigned and improved multiple web pages for clarity, layout, and user experience, applying HTML/CSS and WordPress editor tools.
- Managed plugin updates and configurations, ensuring compatibility and reducing security exposure across the site ecosystem.
- Documented technical processes and contributed to the internal knowledge base to support the IT team's operational continuity.

ACADEMIC & PERSONAL PROJECTS

WildLitz | React.js, Django, Supabase, RESTful APIs, GitHub

Role: Full-Stack Developer — Capstone Project

- Built a gamified literacy learning platform helping young learners develop reading and language skills through interactive modules and activities.
- Designed and integrated RESTful backend APIs using Django, connected to a React.js frontend for a seamless cross-platform experience.
- Implemented role-based access control for students and educators, along with user progress tracking and activity modules.
- Collaborated in an Agile team across the full development cycle — from requirements and design through to testing and deployment.

Community Development System | Django, MySQL, React.js, RESTful APIs, GitHub

Role: Backend Developer

- Built a Social and Event Management System to streamline community event planning and communication between residents and leaders.
- Developed server-side logic, database schema, and RESTful APIs using Django and MySQL, handling all backend architecture decisions.
- Coordinated closely with the frontend team to ensure clean React.js integration and consistent data flow across the application.

ShoeCommerce | React.js, Supabase

Role: Full-Stack Developer

- Developed a fully functional e-commerce web app for shoe retail with product listings, cart management, and a complete checkout flow.
- Implemented user authentication, product catalog management, and order tracking with a clean, responsive UI.

Personal Portfolio Website | HTML, CSS, JavaScript

Role: Frontend Developer

- Designed and built a responsive personal portfolio showcasing projects, skills, and professional background using vanilla web technologies.

House Selling Website | HTML, CSS, JavaScript (Static Site)

Role: Frontend Developer

- Created a static real estate listing website with property details, images, and intuitive navigation for potential buyers.

EDUCATION

Bachelor of Science in Information Technology Graduated: May 2026

Cebu Institute of Technology – University

Senior High School Diploma Graduated: March 2019

Cebu Institute of Technology – University

High School Diploma Graduated: March 2017

St. Paul School of Medellin
