SUMMARY

Full-stack developer with hands-on experience building and deploying end-to-end web applications with React.js, Next.js, Prisma, and PostgreSQL. Built AI-powered features using the Gemini and OpenAI APIs, and worked in an Agile team on a capstone platform tested with real students. Fast learner who takes initiative and is eager to contribute to a professional development team.

SKILLS

- **Frontend:** React.js, Next.js, JavaScript, HTML, CSS, Tailwind CSS
- **Backend:** Next.js (API Routes, Server Actions), Prisma ORM, REST APIs, Authentication & Role-Based Access Control
- **Databases & BaaS:** PostgreSQL (Supabase), MySQL, Firebase (Firestore, Auth)
- **AI & Tools:** Gemini API, OpenAI API, Git, GitHub, Vercel, Render

PROJECTS

Billify | Next.js, Prisma, PostgreSQL (Supabase), Tailwind CSS | Live: billify-02f8.onrender.com

- Built a full-stack budgeting and bill-management app for tracking recurring bills, due dates, and payment status, with budget creation and spending-category breakdowns.
- Designed the database schema and queries with Prisma ORM on PostgreSQL.
- Developed a reporting dashboard and bill calendar with AI-generated insights that flag bills exceeding a set share of the user's budget.

Closet-AI | React (Vite), Tailwind CSS, Firebase, Cloudinary, Gemini API | Live: closet-ai-ebc44.web.app

- Built an AI-powered outfit-matching app that auto-tags photographed clothing (category, color, pattern, style) using the Gemini API and organizes it into a digital closet.
- Implemented outfit recommendations from a user's own closet, with Firebase Auth/Firestore and Cloudinary for photo storage, deployed as an installable web app.

WildLitz (Capstone) | React.js, Django, Supabase | Live: wildlitz-capstone-raeg.onrender.com

- Built a gamified literacy platform for Grade 3 students in a 5-person Agile team, tested with students across multiple universities.
- Designed REST APIs connected to a React frontend, with role-based access control and progress tracking for students and educators.

ShoeCommerce | React.js, Supabase | Live: shoestore-emd2.onrender.com

- Independently built an e-commerce app with product listings, cart management, checkout, user authentication, and order tracking.

EXPERIENCE

Information Technology Intern (OJT) | Knowles Training Institute, Singapore (Remote)

2026

- Ran ongoing WordPress security scans with Wordfence, resolving plugin vulnerabilities and malware across multiple web properties.
- Monitored uptime and performance, fixing issues before they affected users.
- Redesigned multiple web pages for clarity and layout using HTML/CSS and WordPress editor tools.

EDUCATION

Bachelor of Science in Information Technology

Graduated May 2026

Cebu Institute of Technology – University
