SUMMARY

Full-stack developer with hands-on experience building and deploying end-to-end web applications with React.js, Next.js, Prisma, and PostgreSQL. Built AI-powered features using the Gemini and OpenAI APIs across multiple deployed projects. Fast learner who takes initiative and is eager to contribute to a professional development team.

SKILLS

- **Frontend:** React.js, Next.js, JavaScript, HTML, CSS, Tailwind CSS
- **Backend:** Next.js (API Routes, Server Actions), Prisma ORM, REST APIs, Authentication & Role-Based Access Control
- **Databases & BaaS:** PostgreSQL (Supabase), MySQL, Firebase (Firestore, Auth)
- **AI & Tools:** Gemini API, OpenAI API, Git, GitHub, Vercel, Render

PROJECTS

Billify | Next.js, Prisma, PostgreSQL (Supabase), Tailwind CSS | Live: billify-02f8.onrender.com

- Built a full-stack budgeting and bill-management app for tracking recurring bills, due dates, and payment status, with budget creation and spending-category breakdowns.
- Designed the database schema and queries with Prisma ORM on PostgreSQL.
- Developed a reporting dashboard and bill calendar with AI-generated insights that flag bills exceeding a set share of the user's budget.

Closet-AI | React (Vite), Tailwind CSS, Firebase (Auth, Firestore, App Check, AI Logic), Cloudinary, Gemini API | Live: closet-ai-ebc44.web.app

- Built a mobile-first, installable PWA that detects each garment in a photo using Gemini through Firebase AI Logic, crops it, auto-tags its category, colors, pattern, style, formality, and season, and flags likely duplicates.
- Secured per-user data with Firestore security rules and App Check (reCAPTCHA Enterprise), and set up CI/CD with GitHub Actions to deploy to Firebase Hosting.

AI Interview Simulator | React (Vite), Firebase, Vercel Serverless, Upstash Redis, Gemini API | Live: ai-interview-simulator-ochre.vercel.app

- Built a voice-driven mock interview app where users answer out loud or by typing and get scored on content, clarity, and confidence, with STAR checks, AI follow-up questions, and sample answers from the Gemini API.
- Built a Vercel serverless API that verifies Firebase Auth and App Check tokens, enforces per-user and global rate limits with Upstash Redis, and keeps the Gemini key server-side.
- Added session history with progress charts, PDF export, and a free local Practice Mode, with Firestore security rules protecting each user's data.

EXPERIENCE

Information Technology Intern (OJT) | Knowles Training Institute, Singapore (Remote) **2026**

- Ran ongoing WordPress security scans with Wordfence, resolving plugin vulnerabilities and malware across multiple web properties.
- Monitored uptime and performance, fixing issues before they affected users.
- Redesigned multiple web pages for clarity and layout using HTML/CSS and WordPress editor tools.

EDUCATION

Bachelor of Science in Information Technology **Graduated May 2026**
Cebu Institute of Technology – University

CERTIFICATIONS

Artificial Intelligence (AI) Prompting for Automation Level III | Advanced Institute of Technology (StackTrek), TESDA Micro-Credential Program | May 2026

- Completed three micro-credential courses: Utilize Generative AI; Implement Basic Automation Techniques Using AI Tools; and Ensure Compliance with Data Privacy and Ethics.

AWS Academy Graduate – Cloud Architecting | AWS Academy, Training Badge (60 hours) | Dec 2025

AWS Academy Graduate – Cloud Foundations | AWS Academy, Training Badge (20 hours) | Sep 2025
